

ARHT HOLOGRAMS

Empowering you to make an unforgettable impact. Be anywhere as a life-size, lifelike and real-time hologram

---

- Be everywhere
- Deliver impact
- Improve work-life balance
- Align with ESG goals
- Position your company as tech-forward & futuristic

In today's interconnected world, professionals from various industries constantly face

challenges when it comes to effectively engaging and collaborating with their audiences.

Traditional methods of communication often fall short due to travel limitations, time constraints, and environmental considerations, making it difficult to establish meaningful connections and create impactful interactions.

These challenges highlight the pressing need for innovative solutions that surpass physical boundaries and facilitate seamless engagement, collaboration, and brand experiences across diverse industries and settings.

DELIVER A PRESENTATION YOUR AUDIENCE WILL REMEMBER FOREVER:

- ATTENTION

Studies show that a presenter appearing as a hologram can hold an audience's at-tention far better.

- PERSUASION

For the presentations that matter the most, quality is essential. When a presenter can't be there in person, and a webcam simply won't do, a hologram is the most impressive way to deliver value and convey that your audience truly matters.

- CREATIVITY

Take your presentation to the next level. Deliver impact and ingenuity by incorporat-ing dynamic 3D holographic visuals into your presentation. The possibilities are end-less.

THAT HELPS YOU DO YOUR PART. By avoiding unnecessary airline travel, ground transportation and hotel stays that go with business travel, you are doing your part to reduce carbon emissions and make our planet a little greener and more sustainable.

- CARBON

Business airline travel can be essential, but it is the least efficient, per kilometer, way to go. One trans-Atlantic flight emits the same amount of carbon as heating a house for a year. So don't make unnecessary trips, when you can be there as a hologram.

- BRAND

Each time you beam as a hologram, you reinforce that your organization is responsi-ble and

concerned about the environment, doing your part to reduce global emissions.

- SUSTAINABILITY

Show that your organization is concerned about ESG, and not just about the envi-ronmental impact of distant travel, but the overall impact on employees' health, family life and social balance.

The Technology

- Capture: Presenters are recorded using our ARHT Capture Studio system for both live transmission and pre-recorded holograms. We ensure a seamless and straightfor-ward content creation process, empowering you to deliver captivating presenta-tions effortlessly.
- Transmit: They are then transmitted over the internet in real time through our proprietary ARHT Engine system. Our technology ensures reliable transmission, connecting you with your audience with confidence.
- Display: Presenters appear live as lifelike holograms on our displays - ARHT CAPSULE or ARHT Screens. With clear visuals and lifelike projections, your message reso-nates authentically, fostering engagement and interaction.

PROGRAMAS

What We Do

ARHT has been a pioneering global leader in live hologram technology since 2014. ARHT captures, transmits, and beams presenters as lifelike holograms to appear remotely in one

or multiple places at once and deliver memorable interactions with an in-person audience.

Holographic Display Solutions

ARHT Capsule

Step into the spotlight with ARHT CAPSULE. Deliver captivating live, pre-recorded, and 3D presentations in stunning 4K resolution on our interactive touchscreen. Its seamless setup and intuitive features, including motion sensor and QR code integration, make it the perfect tool for dynamic speakers looking to leave a lasting impression.

With its adaptability to any environment and ease of relocation, ARHT CAPSULE empowers speakers to shine on stage, captivating audiences with immersive experiences.

ARHT Screens

Elevate your presentations to new heights with ARHT Screens. Crafted with cutting-edge technology and available in two sizes, they offer unparalleled performance and flexibility. Ideal for darker on-stage presentations,

ARHT Screens ensure crystal-clear visuals that captivate audiences. Easy transportation and seamless integration with other ARHT solutions make them the ultimate choice for speakers seeking to deliver immersive and impactful presentations.

ARHT Capture Studio

With the ARHT Capture Studio, your presence isn't just recorded; it's immortalized. Our proprietary video and studio gear elevate your ideas, crafting both live and pre-recorded holograms that leave indelible impressions.

Essential for capturing your essence, our studio seamlessly integrates with the ARHT portfolio, enabling you to be beamed anywhere across the world to one of our captivating displays. The world doesn't just observe—it's captivated, it's immersed, it believes.
