

ANIMA ANANDKUMAR

Professor, at CalTech, former Senior Director of AI Research at NVIDIA, and a past Principal Scientist at Amazon Web Services (AWS)

- Offers a rare combination of leading-edge academic research with equally deep experience in business and practical applications
- She specializes in using AI in cloud computing to solve real-world problems
- Former Director of Machine Learning Research at NVIDIA
- Holds the endowed Bren chair at CalTech
- Past Principal Scientist at Amazon Web Services (AWS)
- She has received numerous awards and honors, including an Alfred P. Sloan Fellowship

---

Anima Anandkumar offers that rare combination of leading-edge academic research with equally deep experience in business and practical applications. She specializes in using AI in cloud computing to solve real world problems. Anima Anandkumar is a 2023 Guggenheim Fellow in computer science and a Bren professor at Caltech. She is the former Senior Director of AI Research at NVIDIA and a past Principal Scientist at Amazon Web Services (AWS).

AI and AWS: While at Amazon's web services, Anima was head of research and development providing enterprises with artificial intelligence tools. These include applications for image, scene, and face recognition, chatbot development tools, and real-time text to speech translation. But AI can be applied to an almost limitless range of practical and business problems, and Anima is at the forefront of this expansion, as both a theorist and a practitioner.

Anima also speaks on innovation in the broader sense. She is a champion for enabling AI methods and tools in every part of the cloud and for the kind of progressive, incremental improvements in performance that can make a big difference over time — the same kind of processes with which machines learn.

In addition to her position at NVIDIA, Anima Anandkumar holds the endowed Bren chair at CalTech. She has received numerous awards and honors, including an Alfred P. Sloan Fellowship, a Microsoft Faculty Fellowship, a Google faculty award, and a number of other research and best paper awards. She has been featured in several documentaries and media articles.

TEMAS

Anima Anandkumar tailors each presentation to the needs of her audience and is not limited to the topics listed below. Please ask us about any subject that interests you:

- Artificial Intelligence
- Big Data
- Empowering Women

- Futurism
- Technology
- Women In Technology
- Innovation
